

Stamford COMMUNITY BUILDING Meeting

August 21, 2018

Attendees: Pat, Caroline, Victoria, Bill, Carolyn

Update on the design for the front of the school/town office space:

Victoria brought a three dimensional maquette (model) of the concept. Caroline is looking into getting a computer assisted drawing (CAD) of the model made to be shared with anyone interested. The CAD could be added to the stamfordvt.org website. The model will be housed at the library for anyone to see and make comments.

Additional Surveys

A member of the Select Board recommended that the survey used to determine interest in this project be more widely distributed. The current plan is to include a very brief survey in the tax bill mailing at the end of September. Surveys could be returned to the town office or to the library.

Project Manager

We still need information on the project design and approximate cost before approaching individuals who might like to serve as project manager.

Architectural Drawings

The Conway School of Landscape Design and Norwich University have been contacted to determine their willingness to help with this project. We hope to have more information to report at the next meeting.

Funding

We need a subgroup to pursue funding sources. Pat will review the list of individuals who indicated they might be interested in grant writing.

Library Program and Bulletin Boards

Victoria has volunteered to run a program for students grades 4-12 on Saturdays to make ceramic tiles for the posts included on the posts and bulletin boards. Hopefully this portion of the overall project would be completed by summer 2019.

Next Meeting: Wednesday, September 12. Time and location TBA.
